OUR FACILITY.

INPATIENT ADMISSIONS PROCESS

Nexus Health Systems' admission team works closely with referring facilities, case managers, and family members to ensure the admissions process is efficient. To refer a patient or to schedule a complimentary informational session or tour for your patient at Nexus Neurorecovery Center, **please call the admissions office.**

Every patient served will need a physician's order/referral to proceed. All major insurance plans, workers' compensation, and personal injury payments accepted.

VOCATIONAL PROGRAM

REINSTATING LIVES OF INDEPENDENCE.

VOCATIONAL REHABILITATION FOR A MEANINGFUL AND PRODUCTIVE LIFE

Nexus Neurorecovery Center believes each person has the right to live and work in an environment that provides the greatest degree of independence and highest quality of life possible. Each resident enrolled in our Vocational Services Program receives a comprehensive vocational assessment to determine a customized treatment plan consistent with their unique interests, capabilities, and short and long-term goals. The program provides ample opportunities for patients to develop a set of skills to include on a resume with the goal of returning to competitive, meaningful employment – because we're focused on **mending minds.**

The Vocational Services Program enhances physical endurance, cognitive skills, positive worker traits and marketable skills, while complementing the goals set forth by the physical, occupation, and speech therapies. Staged in seven real-world work environments, residents follow directions, interact with coworkers and supervisors, assess quality of work standards, solve problems, and clock in-out while following assigned shifts, all efforts rewarded financially. This program allows for residents to enhance their independent living skills.

ON-CAMPUS JOB TRAINING

Helping residents build confidence, increase physical stamina, and develop works skills, our on-campus job training offers a variety of employment options where individuals earn pay, including:

1 HORTICULTURE

The 4,000 square foot greenhouse and three shade houses is where all phases of landscaping, ground maintenance, and gardening take place as a therapy component for patients improve physical stamina, cognitive skills, safety awareness, attention to detail, production speed, and work quality skills. Social and interpersonal skills are also developed with off campus field trips to local arboretums, nurseries, extension offices, and botanical gardens.

2 GIFT SHOP

Primarily run by residents, the gift shop teaches skills required in a retail enterprise. Residents operate the cash register, handle money, arrange merchandise, mark prices, and maintain cleanliness. They help order products and learn how to maintain inventory. At the end of each business day, they account and reconcile cash with register sales.

3 PRINT SHOP

The print shop educates residents on utilizing creative skills by developing artwork and delivering the final products to customers. Besides screening company uniforms, the Print Shop also screen prints products for 27 outside contracts including private businesses, churches, schools, and various social groups. Quality of work is a special focus, and teamwork and interpersonal skills are enhanced.

4 CRAFT SHOP

The craft shop provides opportunities to explore creative skills through handmade crafts while assisting physical and psychological rehabilitation. Cognition, hand-eye coordination, sequencing, and frustration tolerance are truly tested as residents learn different knots while making ParaCord products and other crafts. Most of the craft items are sold in the Nexus Neurorecovery Center Gift Shop.

5 AUTO DETAILING

Residents learn the process of washing, waxing, and detailing the interiors and exteriors of the company vehicles and staff vehicles. Marketing, promotional, and customer services skills are developed as residents sell the on-campus punch cards and complete paperwork.

EXECUTIVE DEVELOPMENT

This curriculum prepares residents to return to business world. Residents learn strategic planning based on leadership skills, financial statements, competitive analysis, key performance indicators, metrics, and effective communication. The managers' toolbox reinforces entrepreneurial practices, and the can be a fully developed mock business plan or have a focus on a specific discipline.

COMMUNITY RE-ENTRY ASSESSMENTS

Based on residents' performance, Community Re-Entry Assessments identify if patients can successfully proceed into job placement for competitive or non-competitive employment. Tangible and intangible outcomes can include regaining a sense of identity and self-esteem, freedom from social isolation, decreased stress, and improved relationships.

VOCATIONAL EVALUATIONS

Before pursuing the labor market, formal evaluations are given to assess aptitude, interest, skills, and abilities. Assessments along with situational work samples are administered to identify and analyze transferable skills resulting in a viable job goal and vocational plan. Local labor markets are surveyed to ensure the job goal is achievable and potential employers are identified. These evaluations are intricate and can take three to five days to administer completely.

Additional Program components include:

- Return to Work Planning
- Personal Social Adjustment Training (PSAT)
- Job Readiness Training (JRT)
- Job Placement Services
- Supported Employment (SE)
- Community Partners for Employment Trials
- Work Site Assessment
